## Club Meetings

Second Sunday of month 7:00 pm

De Marini's Restaurant

N88 W15229 Main Street

Menomonee Falls, WI 53051

## Flying Site:

N61 W17000 Kohler Lane

Menomonee Falls, WI

## President's PreFlight

“You don't own success. It's rented. You've got to earn it every day.”

Mike McCarthy, Packers Head Coach

### Cancelled on account of Football?

I don't think I can recall a time that a club meeting was cancelled on account of football, but I can't say I was too disappointed in the outcome. What a thrill it was to watch the Packers defeat their conference rivals and powerhouse from Dallas. I was yelling so much that I was hoarse by the end of the game ... and I was the only one home at the time. Regrettably, the euphoria of winning wasn't to last. As Mike McCarthy said, success is only rented.

Well, the rent was due and the Packers failed to make their payment when it came time for the Falcons. We can complain all we want, but I would wager that few people thought the Packers had any chance of being one game away from the Super Bowl when they were sitting at 4 wins and 6 losses in late November. It was a great and memorable season!

### New Year's Day Chili Dump

What a great turnout we had for this year's New Year's Day Chili Dump with more than 20 club members in attendance. The weather was great with temps in the low to mid 30s, calm winds and blue-bird skies

Thanks to all who attended, especially Todd Davis, John Kreitzer, and Tim Roliff, who coordinated the event in my absence. I certainly appreciate it.

Continued on next page .....

## Charity Event

Preparations for the Charity event are well underway. The date is set at Saturday, August 26th with Sunday the 27th as the rain-date. As with last year, the club board will be coordinating the event. John Kreitzer has already secured raffle donations from several RC manufacturers.

We had a great group of people step up to help last year. We're hoping the same can happen this time around as well. Just let one of the board members know if you'd like to be part of this important event.

## Web Site

A redesigned Flying Electrons web site is close to being completed and should be available soon. Thanks to all who have provide feedback during the design process. The improved navigation and layout will help people find the things they're looking for with ease.

## Solar Charging System

I've been in touch with a couple of the Pebble Creek Flyers board members about their solar charging system. They were excited to hear from us and are more than happy to give us a tour of their system and help with sourcing the components should we decide to go that way.

The board is planning a visit in the coming weeks. If you'd like to be part of it, shoot me a quick email and I'll keep you posted on date and time. Who knows, if it's a nice day, we may even get in a flight or two.

## Presidential Inauguration

When thinking about watching the Presidential Inauguration, the words boring, pompous platitudes, and grandstanding might come to mind. However, this past inauguration had special meaning for the Burzinski family.

As many of you know, my son Andrew is in his Plebe year at the US Merchant Marine Academy and given his extensive music background, he was automatically assigned to the USMMA Regimental Band.

The Regimental Band has represented the academy in all Presidential Inaugural Parades since 1971. When Andrew found that out, he decided he not only wanted to be in the parade, he wanted to lead the band as its drum major.

Considering a Plebe carries about "zero" influence and respect in the regiment, Andrew had to do some wheeling and dealing with the Regimental Bandmaster.

Amongst other things, they agreed that if he organized and led a jazz band, along with performing a solo at the academy's annual Beat Retreat variety show, they would allow him to lead the band as its drum major.

The deal was made and honored on both ends. My wife and I took the afternoon off work to watch the Inaugural Parade and were treated to a nationally televised close-up shot of Andrew saluting the presidential viewing stand as they marched by.

Regardless of where you stand politically, you can't help but take pride in moments like this.

Joe Burzinski

# Name That Plane: February by Tim Roliff

**Note: Need to provide Name and Designation!!!**

January's Aircraft-The Wittemann-Lewis NBL-1 Barling Bomber

The "Barling Bomber" was an experimental long-range, heavy bomber built for the United States Army Air Service in the early 1920s. Although unsuccessful as a bomber, it was an early attempt at creating a strategic bomber.

Development of the XNBL-1 (Experimental Night Bomber, Long Range) Barling Bomber is generally attributed (the press called it "Mitchell's Folly") to William "Billy" Mitchell, a U.S. Army Air Service General and most vocal advocate of strategic airpower, who in 1919 discovered Walter H. Barling, who had previously worked for the Royal Aircraft Factory. Mitchell asked Barling to design a bomber capable of carrying enough bombs to sink a battleship.

Mitchell's goal was to demonstrate the effectiveness of airpower by sinking a battleship from the air, and needed a large, strategic bomber in order to accomplish this feat. Mitchell projected the cost of two prototype bombers at \$375,000. On 15 May 1920, the Army Engineering Division sought bids for the construction of a bomber based on Barling's sketches, with the requirement that it be capable of carrying a 5,000 lb. (2,300 kg) bomb load, to an altitude of 10,000 ft. (3,000 m) at a speed of no less than 100 mph (160 km/h).

Correct entries were submitted by Henry Reed, Todd Davis, John Kreitzer, Ed Malec and Dan Franklin.

## Name That Plane Contest Details:

- Check each issue of Flypaper for the current "mystery aircraft" photo
- Send your answer via email to: [namethatplane@sbcglobal.net](mailto:namethatplane@sbcglobal.net).
  - ⇒ Please note - answers will only be accepted by email and only at this address
- Any Flying Electrons member that responds correctly and attends that month's meeting will be entitled to a free raffle ticket
- Tickets must be claimed in person at the current month's meeting only
- There will be no Name the Plane contest in December
- Winners will be listed in the following month's newsletter and announced at our meeting
- Open to current Flying Electrons members only
- Suggestions for future mystery planes are welcome
- Send your comments or suggestions to [namethatplane@sbcglobal.net](mailto:namethatplane@sbcglobal.net)

**FOR  
SALE**

## Chip Hyde DOUBLE VISION

I am offering this 50 CC size Bi-plane for the flyer that is looking for an airplane that is fully capable of both precision aerobatics and full blown more extreme 3-D aerobatics.

Wingspan 74 inches ,Length 83 inches, Wing Area 1600 sq. inches  
Ailerons have been hinged, firewall prepared and the motor mounts installed for the DA-50

Besides the basic ARF, I have wheels, axles, gas tank, EDR-1070 Fiber Optic Sender and EDR-107 Kill Switch, aluminum landing gear and carbon fiber landing gear etc.

Asking \$350 or Best Offer Jim Zahorik [jzahorik1@wi.rr.com](mailto:jzahorik1@wi.rr.com) 262-490-1412

Hobby / Recreational Flying

# What Can I Do With My Model Aircraft?

Having fun means flying safely! Hobby or recreational flying doesn't require FAA approval but you must follow safety guidelines. Any other use requires FAA authorization.

**AVOID DOING ANYTHING HAZARDOUS TO OTHER AIRPLANES OR PEOPLE AND PROPERTY ON THE GROUND**

- ✓ **DO** fly a model aircraft/UAS at the local model aircraft club
- ✓ **DO** take lessons and learn to fly safely
- ✓ **DO** contact the airport or control tower when flying within 5 miles of the airport
- ✓ **DO** fly a model aircraft for personal enjoyment
- ✗ **DON'T** fly near manned aircraft
- ✗ **DON'T** fly beyond line of sight of the operator
- ✗ **DON'T** fly an aircraft weighing more than 55 lbs unless it's certified by an aeromodelling community-based organization
- ✗ **DON'T** fly contrary to your aeromodelling community-based safety guidelines
- ✗ **DON'T** fly model aircraft for payment or commercial purposes

For more information about safety training and guidelines, visit [www.knowbeforeyoufly.org](http://www.knowbeforeyoufly.org)

For more information, visit  
[www.faa.gov/uas](http://www.faa.gov/uas)
